Deterring Terrorism Andreas Wenger 2012-09-19 During the Cold War, deterrence theory was the cornerstone of U.S. foreign policy. Following the 9/11 terrorist attacks, however, popular wisdom dictated that terrorist organizations and radical fanatics could not be deterred—and governments shifted their attention to combating terrorism rather than deterring it. This book challenges that prevailing assumption and offers insight as to when and where terrorism can be deterred. It first identifies how and where theories of deterrence apply to counterterrorism, highlighting how traditional and less-traditional notions of deterrence can be applied to evolving terrorist threats. It then applies these theoretical propositions to real-world threats to establish the role deterrence has within a dynamic counterterrorism strategy—and to identify how metrics can be created for measuring the success of terrorism deterrence strategies. In sum, it provides a foundation for developing effective counterterrorism policies to help states contain or curtail the terrorism challenges they face.

History of Flotation A. J. Lynch 2010 Flotation was the process that transformed the non-ferrous mining industry and the industries and economies of the world. It was an improbable process; nobody could have imagined 100 years ago that floating high specific gravity particles on water would be the basis of one of the world's great technologies. This book tells the story of the early days of flotation and is as much about the engineers, managers and financiers who supported the experiments and built the plants as it is about the technology that was developed. Flotation practitioners will enjoy reading about the history of flotation machines, the ingenuity applied and the competitive tension between the manufacturers.

Righteous Porkchop Nicolette Hahn Niman 2010-10-19 Asked to head up Robert F. Kennedy Jr.'s environmental organization's "hog campaign," Nicolette Hahn Niman embarked upon a fascinating odyssey through the inner workings of the "factory farm" industry. What she discovered transformed her into an intrepid environmental lawyer determined to lock horns with the big business farming establishment. She even, unexpectedly, found love along the way. A searing account of an industry gone awry and one woman's passionate fight to remedy it, Righteous Porkchop chronicles Niman's investigation and her determination to organize a national reform movement to fight the shocking practices of industrial animal operations. She offers necessary alternatives, showing how livestock farming can be done in a better way—and she details both why and how to choose meat, poultry, dairy, eggs, and fish from traditionally farmed sources.

Maximum Mini Jeroen Booij 2009-03-15 This book focuses solely on the cars derived from the classic Mini. Small GTs, sports cars, roadsters and fun cars: Mini-derivatives that changed the

specialist motoring market completely in the early sixties, and new designs kept it busy for nearly four decades. From the well known Mini Marcos and Unipower GT that raced at Le Mans, to the very obscure but as exciting Coldwell GT or Sarcon Scarab, almost 60 cars are thoroughly researched, described and photographed in this book.

First Overland Tim Slessor 2016-03-07 Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work – wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore – to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished – with a foreword by Sir David Attenborough. After all, it was he who gave them that film.

Acting (Re)Considered Phillip B. Zarrilli 2005-06-28 Acting (Re)Considered is an exceptionally wide-ranging collection of theories on acting, ideas about body and training, and statements about the actor in performance. This second edition includes five new essays and has been fully revised and updated, with discussions by or about major figures who have shaped theories and practices of acting and performance from the late nineteenth century to the present. The essays - by directors, historians, actor trainers and actors - bridge the gap between theories and practices of acting, and between East and West. No other book provides such a wealth of primary and secondary sources, bibliographic material, and diversity of approaches. It includes discussions of such key topics as: * how we think and talk about acting * acting and emotion * the actor's psychophysical process * the body and training * the actor in performance * non-Western and cross-cultural paradigms of the body, training and acting. Acting (Re)Considered is vital reading for all those interested in performance.

Autocourse Alan Henry 2000 Tracing the history of Grand Prix racing since the inaugural race was first held on a wartime airfield at Silverstone in 1950, this book examines how motor racing has evolved in spectacular fashion, developing from a minority sport followed by a dedicated few into the worldwide spectacle it is now. Although the book is broadly chronological, it does not describe every race ever run since the creation of the FIA Driver's World Championship, instead it captures the flavour of each period and identifies the trends and technical developments that characterise it. The history also includes a detailed results section.

Starspeak Dawn Henderson 2012-12-01 Messages of ascension, love, contact and more in the words of our star brothers and sisters. We are moving through a time of massive change,

unprecedented in recorded memory, a time in which life as we know it is being turned upside down. But we do not have to travel through this often confusing and disorientating process alone, for from across the galaxies our star brothers and sisters have gathered to help us through this transformation. Many people on Earth are now being contacted by these loving beings, receiving their words of guidance, encouragement and reassurance to share with those who as yet do not hear them. This book contains some of these messages, received by the author from the star beings of light, messages that are filled with the love and wisdom of the universe. Dawn Henderson is an author, channel and spiritual teacher who lives in the ancient mystical landscape of Wiltshire, England.

Jaguar XK120 In Detail Anders Ditlev Clausager 2005-12-05 This is the eighth title in the now well-established In Detail series. Its subject, the Jaguar XK120, has become one of the immortals of sports car history and remains one of the most beautiful cars ever built. It took the London Motor Show by storm in 1948, and was built until 1954. Combining extraordinary docility with a startling 120mph top speed, it was the car to be in, whether for cruising California boulevards or racing at Le Mans. The book is published in association with the Jaguar Daimler Heritage Trust and written by the Trust's Archivist. Drawing from company records and archives, he has been able to provide information on the XK120 that has never been available to enthusiasts before. This, and its focus on the XK120 alone rather than on the whole XK family, make this book uniquely informative.

Persian Fire Tom Holland 2011-04-21 In 480 BC, Xerxes, the King of Persia, led an invasion of mainland Greece. Its success should have been a formality. For seventy years, victory - rapid, spectacular victory - had seemed the birthright of the Persian Empire. In the space of a single generation, they had swept across the Near East, shattering ancient kingdoms, storming famous cities, putting together an empire which stretched from India to the shores of the Aegean. As a result of those conquests, Xerxes ruled as the most powerful man on the planet. Yet somehow, astonishingly, against the largest expeditionary force ever assembled, the Greeks of the mainland managed to hold out. The Persians were turned back. Greece remained free. Had the Greeks been defeated at Salamis, not only would the West have lost its first struggle for independence and survival, but it is unlikely that there would ever have been such an entity as the West at all. Tom Holland's brilliant new book describes the very first 'clash of Empires' between East and West. Once again he has found extraordinary parallels between the ancient world and our own. There is no competing popular book describing these events.
