Racial Ambiguity in Asian American Culture Jennifer Ann Ho 2015-05-12 The sheer diversity of the Asian American populace makes them an ambiguous racial category. Indeed, the 2010 U.S. Census lists twenty-four Asian-ethnic groups, lumping together under one heading people with dramatically different historical backgrounds and cultures. In Racial Ambiguity in Asian American Culture, Jennifer Ann Ho shines a light on the hybrid and indeterminate aspects of race, revealing ambiguity to be paramount to a more nuanced understanding both of race and of what it means to be Asian American. Exploring a variety of subjects and cultural artifacts, Ho reveals how Asian American subjects evince a deep racial ambiguity that unmoors the concept of race from any fixed or finite understanding. For example, the book examines the racial ambiguity of Japanese American nisei

Yoshiko Nakamura deLeon, who during World War II underwent an abrupt transition from being an enemy alien to an assimilating American, via the Mixed Marriage Policy of 1942. It looks at the blogs of Korean, Taiwanese, and Vietnamese Americans who were adopted as children by white American families and have conflicted feelings about their “honorary white” status. And it discusses Tiger Woods, the most famous mixed-race Asian American, whose description of himself as “Cablinasian”—reflecting his background as Black, Asian, Caucasian, and Native American—perfectly captures the ambiguity of racial classifications. Race is an abstraction that we treat as concrete, a construct that reflects only our desires, fears, and anxieties. Jennifer Ho demonstrates in *Racial Ambiguity in Asian American Culture* that seeing race as ambiguous puts us one step closer to a potential antidote to racism.

Contemporary Christianity and LGBT Sexualities Stephen Hunt 2016-05-13 The

subject of gay and lesbian sexuality is perhaps the most vexed issue in the contemporary Christian Church. Many churches have been forced to confront the matter, both theologically and pastorally and in consequence, controversies have proved divisive within the Church, most notably between conservative and liberal orientated denominations, as well as evangelical churches. This book explores these themes from a sociological perspective, addressing not only gay and lesbian sexualities, but also bi- and transgendered sexualities. With rich empirical material being presented by a team of experts, this book constitutes the first comprehensive sociological study of 'non-hetero' sexualities in relation to contemporary Christianity. As such, it will appeal to sociologists, scholars of religion and theology as well as readers across a range of social sciences

The Legend of Colton H Bryant Alexandra Fuller 2009-04-06 Colton H. Bryant grew up in Wyoming and never once wanted to leave it. Wyoming loved him and he loved it back. Two things helped Colton get through school and the neighbourhood bullies: his best friend Jake and his favourite mantra: Mind over matter-- which meant to him: if you don't mind, it don't matter. Colton and Jake grew up wanting nothing more than the freedom to sleep out under the great Wyoming night sky, and to be just like Jake's dad, Bill, a strong, gentle man of few words who can ride rodeo like nobody's business. When Colton started work as a driller on a rig, despite his young wife begging him to quit, he claimed it was in his blood. Colton did die young and he died on the rig -- falling to his death because the oil company neglected to spend the \$2,000 on safety rails. His family received no compensation. The strong, sad story of Colton H. Bryant's life could not be told without the telling of the land that grew him, where there are still such things as cowboys roaming the plains, where it is relationships that get you through and where a simple, soulful and just man named Colton H. Bryant lived and died.

Better Britons Nadine Attewell 2014-02-05 In 1932, Aldous Huxley published *Brave New World*, his famous novel about a future in which humans are produced to spec in laboratories. Around the same time, Australian legislators announced an ambitious experiment to “breed the colour” out of Australia by procuring white husbands for women of white and indigenous descent. In this study, Nadine Attewell reflects on an assumption central to these and other policy initiatives and cultural texts from twentieth-century Britain, Australia, and New Zealand: that the fortunes of the nation depend on controlling the reproductive choices of citizen-subjects. *Better Britons* charts an innovative approach to the politics of reproduction by reading an array of works and discourses – from canonical modernist novels and speculative fictions to government memoranda and public debates – that reflect on the significance of reproductive behaviours for civic, national, and racial identities. Bringing insights from feminist and queer theory into dialogue with work in indigenous studies, Attewell sheds new light on changing conceptions of British and settler identity during the era of decolonization.

Reading the New Testament John Court 2008-01-28 *Reading the New Testament* is the lead volume to the successful *New Testament Readings Series*. It analyzes the many ways in which the New Testament can be read and interpreted. Rather than prescribing one 'correct' way of reading, this study offers an overview of and introduction to the most influential theories of recent scholarship, discussing the

background against which such theories are developed. It shows the advantages of combining methods of reading, thus stimulating an interaction between various approaches, illustrated by the individual volumes in the series. This is an important addition to New Testament literature, offering the student of religion a comprehensive overview of the methods and approaches used by scholars in the field.

The Microscope in the Dutch Republic Edward G. Ruestow 2004-01-22 Focusing on the two seventeenth-century pioneers of microscopic discovery, the Dutchmen Jan Swammerdam and Antoni van Leewenhoek, Ruestow demonstrates that their uneasiness with their social circumstances spurred their discoveries. Though arguing that aspects of Dutch culture impeded serious research with the microscope, Ruestow also shows, however, that the culture of the period shaped how Swammerdam and Leewenhoek responded to what they saw through the lens. He concludes by emphasising how their early microscopic efforts differed from the institutionalised microscopic research that began in the nineteenth century.
