Hijacking History Kathleen Wellman 2021 "This book insists that history matters. What if current divisions in America rest, in part, on a fundamental divergence in the understanding of our history? The book proposes the three most prominent Christian curricula have played a role through the historical narrative promoted for almost fifty years, becoming more widespread in different forms of alternative schooling from Christian schools to voucher programs, and homeschooling. Their narrative has been significant in defining Americans' understanding of the world and its history and exposes the efficacy of the alliance between certain religious interests, conservative legislators and school boards, and various corporate interests in reshaping education in the United States. The campaign for a "Christian right history" is analogous to the successful advocacy for "intelligent design" in public school science curricula. Many conservative institutions support both the inclusion of politically conservative and Christian content into school curricula"--

Earth Science R. Terrance Egolf 2012 Earth Science, 4th Ed. is an expedition. Your students will find themselves climbing mountains, diving into the oceans, and launching into the skies on a quest to learn how the world works. During this quest, students will find that Earth science is also a battle of worldviews. This text clearly introduces students to the secular theories of where everything they see came from. They critique these theories. For each secular theory, the text affirms the conservative biblical view of Earth's history shaped by Creation, the Fall, and the Flood. Students' Christian worldviews will be shaped and strengthened as they learn about tectonic processes, landforms and earth materials, fossils, the oceans and oceanography, rivers and lakes, the atmosphere, weather and storms, climate and environmentalism, the solar system, the universe and cosmology, and space science. - Publisher.
