Quick Check Exercises: Each exercise set begins with approximately five exercises (answers included) that are designed to provide the student with an immediate assessment of whether he or she has mastered key ideas from the section. They require a minimum of computation and can usually be answered by filling in the blanks. ?

Focus on Concepts Exercises: Each exercise set contains a clearly-identified group of

problems that focus on the main ideas of the section. ? Technology Exercises: Most sections include exercises that are designed to be solve using either a graphing calculator or a computer algebra system such as Mathematica, Maple, or Derive. These exercises are marked with an icon for easy identification. ? Expository Excellence: Clear explanations allow students to build confidence and provide flexibility for the instructor to use class time for problem solving, applications and explanation of difficult concepts. ? Mathematical Level: The book is written at a mathematical level that is suitable for students planning on careers in engineering or science. ?
