The future of the UK's strategic nuclear deterrent Great Britain: Parliament: House of Commons: Defence Committee 2006-12-19 In its White Paper (published in December 2006 as Cm 6994, ISBN 0101699425) on the future of the UK's nuclear deterrent, the Government reaffirmed its commitment to maintain the submarine-based Trident weapons system. This will require the procurement of a new generation of nuclear-powered Trident submarines to replace the current fleet of Vanguard-class submarines. Following on from the Committee's earlier report on the strategic context and timetable for decision-making on the renewal of the UK's nuclear deterrent (HCP 986, session 2005-06; ISBN 0215029445), this report focuses on issues related to the UK manufacturing and skills base. These include: the level of investment needed to sustain essential infrastructure and core skills in the UK submarine construction industry; the potential consequences of a gap in the submarine building programme for the long-term viability of the domestic manufacturing and skills base; the implications of the rationalisation of the UK shipbuilding industry for the construction, maintenance and affordability of a Vanguard-class successor; and the linkage between the Government's Defence Industrial Strategy and the decision on retention, replacement or abolition of the UK's Trident system. It also examines the Government's investment programme at the Atomic Weapons Establishment and the possible impact of a new civil nuclear build programme for the retention of nuclear skills and expertise in the military sector.

Brief Answers to the Big Questions Stephen Hawking 2018-10-16 THE NO.1 SUNDAY TIMES BESTSELLER 'A beautiful little book by a brilliant mind' DAILY TELEGRAPH 'Effortlessly instructive, absorbing, up to the minute and - where it matters - witty' GUARDIAN The world-famous cosmologist and #1 bestselling author of *A Brief History of Time* leaves us with his final thoughts on the universe's biggest questions in this brilliant posthumous work. Is there a God? How did it all begin? Can we predict the future? What is inside a black hole? Is there other intelligent life in the universe? Will artificial intelligence outsmart us? How do we shape the future? Will we survive on Earth? Should we colonise space? Is time travel possible? Throughout his extraordinary career, Stephen Hawking expanded our understanding of the universe and unravelled some of its greatest mysteries. But even as his theoretical work on black holes, imaginary time and multiple histories took his mind to the furthest reaches of space, Hawking always believed that science could also be used to fix the problems on our planet. And now, as we face potentially catastrophic changes here on Earth - from climate change to dwindling natural resources to the threat of artificial super-intelligence - Stephen Hawking turns his attention to the most urgent issues for humankind. Wide-ranging, intellectually stimulating, passionately argued, and infused with his characteristic humour, *Brief Answers to the Big Questions*, the final book from one of the greatest minds in history, is a personal view on the challenges we face as a human race, and where we, as a planet, are heading next. The Mismeasure of Man (Revised and Expanded) Stephen Jay Gould 2006-06-17 The definitive refutation to the argument of *The Bell Curve*. When

published in 1981, *The Mismeasure of Man* was immediately hailed as a masterwork, the ringing answer to those who would classify people, rank them according to their supposed genetic gifts and limits. And yet the idea of innate limits—of biology as destiny—dies hard, as witness the attention devoted to *The Bell Curve*, whose arguments are here so effectively anticipated and thoroughly undermined by Stephen Jay Gould. In this edition Dr. Gould has written a substantial new introduction telling how and why he wrote the book and tracing the subsequent history of the controversy on innateness right through *The Bell Curve*. Further, he has added five essays on questions of *The Bell Curve* in particular and on race, racism, and biological determinism in general. These additions strengthen the book's claim to be, as Leo J. Kamin of Princeton University has said, "a major contribution toward deflating pseudo-biological 'explanations' of our present social woes."
