As weeks turn into months and months into years, the shop becomes Henry's only window to the world, where he marks time by the milestones of his former classmates' lives. But his day-to-day measured existence inadvertently conceals a fracture that has caused the disintegration of his family, one that will ultimately reveal the Henry that might have been.

Righteous Porkchop Nicolette Hahn Niman 2010-10-19 Asked to head up Robert F. Kennedy Jr.'s environmental organization's "hog campaign," Nicolette Hahn Niman embarked upon a fascinating odyssey through the inner workings of the "factory farm" industry. A searing account of an industry gone awry and one woman's passionate fight to remedy it, Righteous Porkchop chronicles Niman's investigation and

her determination to organize a national reform movement to fight the shocking practices of industrial animal operations. She offers necessary alternatives, showing how livestock farming can be done in a better way—and she details both why and how to choose meat, poultry, dairy, eggs, and fish from traditionally farmed sources.

International Perspectives on Inclusion within Society and Education Mabel Ann Brown 2020-10-02 International Perspectives on Inclusion within Society and Education explores how the theme of inclusion in education and society plays out across different nations and cultures. Covering topics like dual citizenship, political loyalty, and migration, it includes important discussions around poverty, educational disadvantage, youth radicalisation and inequality. With perspectives from a wide range of countries, including the USA, UK, Finland, Kosovo, Albania, Poland, Lithuania, Latvia, Hungary, Czechoslovakia and India, this book explores how issues of inclusion are often decided by a majority for the majority, which can lead to included minorities feeling disadvantaged and paradoxically excluded. While setting up a strong case for inclusion in society and education, it considers factors such as poverty and mental health both nationally and internationally and evaluates the

effectiveness of additional financial resources and educational support in creating an inclusive world. This book will be of great interest for academics, researchers, and post graduate students in the fields of comparative education, inclusive education, sociology, political sciences and social work.

Invention James Dyson 2021-09-02 Dyson has become a byword for high performing products, technology, design and invention. Now, James Dyson, the inventor and entrepreneur who made it all happen, tells his remarkable and inspirational story in *Invention: A Life*. Famously, over a four-year period, James Dyson made 5127 prototypes of the cyclonic vacuum cleaner that would transform the way houses are cleaned around the world. In devoting all his resources to iteratively developing the technology, he risked it all, but out of many failures and setbacks came hard-fought success. His products - including vacuum cleaners, hair dryers and hair stylers, and fans and

purifiers - are not only revolutionary technologies, but design classics. This was a legacy of his time studying at the Royal College of Art in the 1960s, when he was inspired by some of the most famous artists, designers and inventors of the era, as well as his engineering heroes such as Frank Whittle and Alec Issigonis. In *Invention: A Life*, Dyson reveals how he came to set up his own company and led it to become one of the most inventive technology companies in the world. It is a compelling and dramatic tale, with many obstacles overcome. Dyson has always looked to the future, even setting up his own university to help provide the next generation of engineers and designers. For, as he says, 'everything changes all the time, so experience is of little use'. Whether you are someone who has an idea for a better product, an aspiring entrepreneur, whether you appreciate great design or a page-turning read, *Invention: A Life* offers you inspiration, hope and much more.

Edible and Medicinal Wild Plants of Britain and Ireland Robin Harford 2019-12-02 For over fifteen years I have experimented and explored the world of wild plants. Uncovering how our ancestors used plants to nourish and heal

themselves. I've spent thousands of hours digging through scientific papers, read hundreds of books. Even gone so far as to be nomadic for over a year. During this time I followed the seasons and plants around the highways and byways of these isles. I have written this book to help you rediscover our forgotten plant heritage. To learn how to use wild plants as food and medicine. Knowledge that was once common to everyone. A NOTE ON PHOTOS Most wild flower books only provide one photo of each plant for identification. Then a little bit of botanical description. Usually using words that don't mean anything to anybody, unless you are a botany geek. To forage plants safely, you need a specialist plant identification book. Which is why in this book there are no pictures, nor a botanical profile. NICE THINGS PEOPLE HAVE PREVIOUSLY SAID Robin's infectious encyclopaedic enthusiasm is borne from complete commitment to his chosen field. - Michael Kusz You transported us to a whole new level of awareness of not only the plants we got to see, smell and taste, but also the relationship that is possible with our natural environment that most of us have lost over just a single generation. - Richard & Debbie Stansfield My love of the plants and my interaction with them was given a massive boost by your knowledge. - Pip Martin ABOUT THE AUTHOR

Robin Harford is a plant-based forager, ethnobotanical researcher and wild food educator. He has published over 50 foraging guide books. He established his wild food foraging school in 2008, and his foraging courses were recently voted #1 in the country by BBC Countryfile. Robin is the creator of eatweeds.co.uk, which is listed in The Times Top 50 websites for food and drink. He has travelled extensively documenting and recording the traditional and local uses of wild food plants in indigenous cultures, and his work has taken him to Africa, India, SE Asia, Europe and the USA. Robin regularly appears on national and local radio and television. He has been recommended in BBC Good Food magazine, Sainsbury's magazine as well as in The Guardian, The Times, The Independent, The Daily Telegraph etc.

Minds, Brains, and Computers Ralph Morelli 1992 The basic questions addressed in this book are: what is the computational nature of cognition, and what role does it play in language and other mental processes?; What are the main characteristics of contemporary computational paradigms for describing cognition and how do they differ from each other?; What are the prospects for building cognition and how do they differ from each other?; and what are the prospects for building an artificial intelligence?
