21st-Century Statecraft Nayef Al-Rodhan 2022-03-31 This book proposes an innovative and comprehensive framework for conducting statecraft in the 21st century. Called neo-statecraft, this framework is based on the reconciliation of power, interests

and justice. The author proposes four substrates of neo-statecraft: 1) a new structure he calls meta-geopolitics, which includes seven inter-related dimensions of state power and identifies a Geostrategic Tripwire Pivotal Corridor (TPC); 2) a sustainable national security paradigm that stresses the centrality of justice, symbiotic realism and transcultural synergy; 3) a new concept called just power, which states that power must be smart as well as just, and that global justice is above all a national interest of all states; and 4) a new concept called reconciliation statecraft of the eight global interests. Dr. Nayef R.F. Al-Rodhan is Senior Scholar in Geostrategy and Director of the Programme on the Geopolitical Implications of Globalisation and Transnational Security at the Geneva Centre for Security Policy, Geneva, Switzerland. "This book offers a refreshing and ambitious re-examination of the nature of statecraft and geopolitics and contains a number of relevant concepts that can be translated into brand-new research and ambitious policy goals. Building on a number of his previous concepts, the author continues a remarkable endeavour aimed at updating and adapting traditional geopolitical perceptions. Step by step, brick after brick, the author is clearly building a major comprehensive contribution to strategic thinking and diplomacy." Professor Francois Gere, Director of Research at Paris 3 Sorbonne Nouvelle and President of the French Institute for Strategic Analysis (IFAS), Paris, France. "This book provides a carefully crafted description of how the international system is being transformed and defines the challenges facing contemporary statecraft in handling that transformation. Nayef Al-Rodhan has undertaken this enormous task by defining the concept of meta-geopolitics and addressing potential future problems while making full use of the analytical tools that he has developed. It is a unique and intellectually courageous undertaking that will help us gain deeper insights into the many dimensions of current and future security challenges." Ambassador Rolf Ekeus, Chairman of the Stockholm International Peace Research Institute (SIPRI), Stockholm, Sweden.

SAMT 1982

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a

vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Study and Master Life Sciences Grade 11 CAPS Study Guide Gonasagaren S. Pillay 2014-08-21

A Cautious Silence Geoffrey G. Gray 2007 The first exploration of modern Australian social anthropology, this study examines the forces that helped shaped its formation and reveals the struggles to establish and consolidate anthropology in Australia as an academic discipline. Once demonstrating that their discipline was the predominant interpreter of Indigenous life, anthropologists have assisted government in the control, development, and advancement of Indigenous peoples.

Mission, Science, and Race in South Africa Keith Snedegar 2015-09-17 This book examines the cultures of colonial science, missionary education, and racial politics in South Africa through the life of A. W. Robert, a key participant in all three fields. This study gives insight into the porous nature of categories such as missionary evangelism, research in the physical sciences, and racial politics, which are traditionally segregated from one another in historical discourse.
