Management and Entrepreneurship Veerabhadrapa Havinal 2009 About the Book: Of late, academicians of technical education have felt the importance of "Management" and "Entrepreneurship". Engineers need to manage their departments/sections/subordinates, and Entrepreneurship helps the large pool of technical manpower in developing small-scale industries in high tech areas thereby contributing to the economy of the country. This book covers both 'Management' and 'Entrepreneurship'. The first chapters of this book deal with Management, Planning, Organizing and Staffing, Directing and Controlling. The last four chapters deal with Entrepreneurship, Small-Scale Industries, Institutional support and Project formulation. Adequate number of simple examples with which the students are familiar are included in each chapter. In addition, each chapter contains student learning activities to give the readers a chance to enhance the learning process. Though the book is written keeping in mind the syllabus of Visvesvaraya Technological University, yet it is useful for

B.Com, BBM, DBM, . PGDBM and MBA students also. Contents: Management Planning Organizing and Staffing Directing and Controlling Entrepreneurship Small-Scale Industries Institutional Support Preparation of Project.

Gender Inclusive Engineering Education Julie Mills 2011-02-09 Women continue to comprise a small minority of students in engineering education and subsequent employment, despite the numerous initiatives over the past 25 years to attract and retain more women in engineering. This book demonstrates the ways in which traditional engineering education has not attracted, supported or retained female students and identifies the issues needing to be addressed in changing engineering education to become more gender inclusive. This innovative and much-needed work also addresses how faculty can incorporate inclusive curriculum within their courses and programs, and provides a range of exemplars of good practice in gender inclusive engineering education that will be immediately useful to faculty who teach

engineering students.
