Empowering Novice Academics for Student Success Dr Johann Hugo 2021-04-26 The preparation for a career in education and training cuts into all three categories of knowledge: cognitive, affective, and psychomotor, and all four dimensions of competence. The implication is that effective teaching requires not only theoretical knowledge, but also practical abilities that include a range of instructional skills and techniques. The workbook therefore contains a number of activities intended to promote professional competence. The types of activities vary: they are used to stimulate thinking (promoting reflective practice), and provide guidance in the application of knowledge, as well as developing certain instructional skills. Note that the amount of activities included here is only scratching the surface; different teaching matters should receive priority in the continuous professional development (CPD) of academic staff. Readers may perceive some of the activities as challenging, or find it difficult to relate to that, owing to being novices in higher education teaching and learning. In view of this, the reading includes comments on each activity (Activity solutions), as well as comments on the reflection activities, as a further attempt at supporting and enhancing the professional development of novice teachers. The workbook includes reading on aspects of resource design for learning enhancement. Since this particular topic involves many technical aspects, it is presented separately from the content in the textbook, and is regarded as an enrichment opportunity.

Social Science Resources in the Electronic Age: Geography Elizabeth H. Oakes 2004 The Internet has become one of the most efficient and useful ways to obtain information on a particular subject. Geography Resources in the Electronic Age provides basic information on how to navigate the Web and helps students to quickly identify the appropriate geography resources.

Approximately 500 reliable sites listed alphabetically by topic are reviewed. Each site review provides details about the best (and worst) features, specific grade range, and how to use the site for research. Geography Resources in the Electronic Age saves students, teachers, and librarians time in finding the Web's best geography resources. Topics are chosen based on the national geography curriculum, and the Web sites are reviewed by a geographer. Expanded coverage offers information specifically for educators, resources for special needs students, a list of museum and organization Web sites, and information on careers in geography.

Lessons in Electric Circuits: An Encyclopedic Text & Reference Guide (6 Volumes Set) Tony R. Kuphaldt 2011

Clinical Informatics Study Guide John T. Finnell 2022 This completely updated study guide textbook is written to support the formal training required to become certified in clinical informatics. The content has been extensively overhauled to introduce and define key concepts using examples drawn from real-world experiences in order to impress upon the reader the core content from the field of clinical informatics. The book groups chapters based on the major foci of the core content: health care delivery and policy; clinical decision-making; information science and systems; data management and analytics; leadership and managing teams; and professionalism. The chapters do not need to be read or taught in order, although the suggested order is consistent with how the editors have structured their curricula over the years. Clinical Informatics Study Guide: Text and Review serves as a reference for those seeking to study for a certifying examination independently or periodically reference while in practice. This includes physicians studying for board examination in clinical informatics as well as the American Medical Informatics Association (AMIA) health informatics certification. This new edition further refines its place as a roadmap for faculty who wish to go deeper in courses designed for physician fellows or graduate students in a variety of clinically oriented informatics disciplines, such as nursing, dentistry, pharmacy, radiology, health administration and public health.
