Geriatric Physical Therapy - eBook Andrew A. Guccione 2011-03-07 Geriatric Physical Therapy offers a comprehensive presentation of geriatric physical therapy science and practice. Thoroughly revised and updated, editors Andrew Guccione, Rita Wong, and Dale Avers and their contributors provide current information on aging-related changes in function, the impact of these changes on patient examination and evaluation, and intervention approaches that maximize optimal aging. Chapters emphasize evidence-based content that clinicians can use throughout the patient management process. Six new chapters include: Exercise Prescription, Older Adults and Their Families, Impaired Joint Mobility, Impaired Motor Control, Home-based Service Delivery, and Hospice and End of Life. Clinically accurate and relevant while at the same time exploring theory and rationale for evidence-based practice, it's perfect for students and practicing clinicians. It's also an excellent study aid for the Geriatric Physical Therapy Specialization exam. Comprehensive coverage provides all the foundational knowledge needed for effective management of geriatric disorders. Content is written and reviewed by leading experts in the field to ensure information is authoritative, comprehensive, current, and clinically accurate. A highly readable writing style and consistent organization make it easy to understand difficult concepts. Tables and boxes organize and summarize important information and highlight key points for quick reference. A well-referenced and scientific approach provides the depth to understand processes and procedures. Theory mixed with real case examples show how concepts apply to practice and help you enhance clinical decision-making skills. Standard APTA terminology familiarizes you with terms used in practice. A new chapter, Exercise Prescription, highlights evidence-based exercise prescription and the role of physical activity and exercise on the aging process. A new chapter, Older Adults and Their Families, helps physical therapists understand the role spouses/partners and adult children can play in rehabilitation, from providing emotional support to assisting with exercise programs and other daily living activities. New chapters on Impaired Joint Mobility, Impaired Motor Control, Home-based Service Delivery, and Hospice and End of Life expand coverage of established and emerging topics in physical therapy. Incorporates two conceptual models: the Guide to Physical Therapist Practice, 2nd Edition, and the International Classification of Function, Disability, and Health (ICF) of the World Health Organization (WHO) with an emphasis on enabling function and enhancing participation rather than concentrating on dysfunction and disability A companion Evolve website includes all references linked to MEDLINE as well as helpful links to other relevant websites.

Clinical Management of Patients in Subacute and Long-term Care Settings Terry Mahan Buttaro 2006-01-01 "Provides primary care providers with information specific to the medical management of acutely ill adult and elder patients with multiple comorbid health problems. It also contains material on advanced directives, end of life care and regulatory and compliance concerns that often affect treatment decisions in these settings. A section on staff education is also included for nurse practitioners who are directing patient care given by both skilled and unskilled staff in subacute and long term care." --Cover.

Geropsychology and Long Term Care Erlene Rosowsky 2010-01-23 It is with great pride that the Psychologists in Long Term Care (PLTC) have sponsored The Professional Educational Long-Term Care Training Manual, and now its second iteration, Geropsychology and Long Term Care: A Practitioner's Guide. Education of psychologists working in long-term care settings is consistent with PLTC's mission to assure the provision of high-quality psychological services for a neglected sector of the population, i.e., residents in nursing homes and assisted-living communities. To this end,

direct training of generalist psychologists in the nuances of psychological care delivery in long-term care settings has been a major priority. It is a tribute to the accelerating nature of research in long-term care settings that a revision is now necessary. After all, the Professional Educational Training Manual's initial publication date was only in 2001. However, in the intervening years, much progress has been made in addressing assessment and intervention strategies tailored to the needs of this frail but quite diverse population. It is so gratifying to be able to say that there is now a corpus of scientific knowledge to guide long-term care service delivery in long-term care settings.

Manual of Nursing Home Practice for Psychiatrists American Psychiatric Association 2008-11-01 The shifting demographic toward a "graying" population -- coupled with today's reality of managed care -- makes the need for high-quality, cost-effective psychiatric services within the nursing care setting more urgent than ever. As we increase the number of our years, it is also imperative that we enhance the quality of those years. The product of the American Psychiatric Association's (APA's) Council on Aging and its Committee on Long-Term Care and of the Elderly, the Manual of Nursing Home Practice for Psychiatrists stands out because it focuses on the "how" -- not the "why" -- of nursing home care. Of exceptional importance is its detailed discussion of the Minimum Data Set (MDS), a structured assessment required by both Medicare and Medicaid for all residents of skilled nursing facilities. Divided into six sections, this "how to" volume contains practical information readers can use right away, from getting reimbursed by insurance companies to handling nursing facility politics: Clinical -- History; evaluation and management of psychiatric problems in long-term care patients; an overview of the MDS; sexuality within the nursing home care setting Regulatory -- Introduction to the Nursing Home Reform Act of 1987 (part of OBRA-87) and its implications for psychiatric care; details about the Resident Assessment Instrument (RAI), which includes the MDS, the Resident Assessment Protocols (RAPs), and Utilization Guides specified in the State Operations Manual (SOP) Financial -- Documentation, reimbursement, and coding; what to look for when contracting with nursing homes Legal and ethical -- The dehumanizing effect of diagnostic labels and the ethical issues inherent in regulating daily schedules (e.g., bed, meal, and bath times); nursing home placement; competence and decision-making ability; comfort care for end-stage dementia; coping with Alzheimer's disease; and the role of caregivers Summary and Future Perspectives -- A detailed vision about how psychiatrists can improve the diagnosis and treatment of nursing home patients Appendixes and bibliography -- Staffing recommendations and assessment instruments Edited by a distinguished authority and former chair of the APA's Committee on Long-Term Care and Treatment of the Elderly, this comprehensive volume will appeal to a wide audience of professionals: from general psychiatrists, nurse practitioners, and clinical nurse specialists, to primary care physicians and residents.

Documentation for Rehabilitation Lori Quinn 2015-12-11 Better patient management starts with better documentation! Documentation for Rehabilitation: A Guide to Clinical Decision Making in Physical Therapy, 3rd Edition shows how to accurately document treatment progress and patient outcomes. Designed for use by rehabilitation professionals, documentation guidelines are easily adaptable to different practice settings and patient populations. Realistic examples and practice exercises reinforce concepts and encourage you to apply what you've learned. Written by expert

physical therapy educators Lori Quinn and James Gordon, this book will improve your skills in both documentation and clinical reasoning. A practical framework shows how to organize and structure PT records, making it easier to document functional outcomes in many practice settings, and is based on the International Classification for Functioning, Disability, and Health (ICF) model - the one adopted by the APTA. Coverage of practice settings includes documentation examples in acute care, rehabilitation, outpatient, home care, and nursing homes, as well as a separate chapter on documentation in pediatric settings. Guidelines to systematic documentation describe how to identify, record, measure, and evaluate treatment and therapies - especially important when insurance companies require evidence of functional progress in order to provide reimbursement. Workbook/textbook format uses examples and exercises in each chapter to reinforce your understanding of concepts. NEW Standardized Outcome Measures chapter leads to better care and patient management by helping you select the right outcome measures for use in evaluations, re-evaluations, and discharge summaries. UPDATED content is based on data from current research, federal policies and APTA guidelines, including incorporation of new terminology from the Guide to Physical Therapist 3.0 and ICD-10 coding. EXPANDED number of case examples covers an even broader range of clinical practice areas.
