Snow Crash Neal Stephenson 1994-10-27 "This Snow Crash thing--is it a virus, a drug, or a religion?" Juanita shrugs. "What's the difference?" Using multiple examples of engine builds and case studies, The Chevrolet Small-Block Bible provides the reader with the information needed to build anything for a mild street engine for use in a custom or daily driver to a cost-is-no-object dream build. Architecting the Internet of Things Dieter Uckelmann 2011-04-02 Many of the initial developments towards the Internet of Things have focused on the combination of Auto-ID and networked infrastructures in business-to-business logistics and product lifecycle applications. However, the Internet of Things is more than a business tool for managing business processes more efficiently and more effectively – it will also enable a more

convenient way of life. Since the term Internet of Things first came to attention when the Auto-ID Center launched their initial vision for the EPC network for automatically identifying and tracing the flow of goods within supply-chains, increasing numbers of researchers and practitioners have further developed this vision. The authors in this book provide a research perspective on current and future developments in the Internet of Things. The different chapters cover a broad range of topics from system design aspects and core architectural approaches to end-user participation, business perspectives and applications.

Little and Often Trent Preszler 2021-04-27 A USA TODAY BEST BOOK OF THE YEAR (????) "Little and Often is a beautiful memoir of grief, love, the shattered bond between a father and son, and the resurrection of a broken heart. Trent Preszler tells his story with the same level of art and craftsmanship that he brings to his boat making, and he reminds us of creativity's power to transform and heal our lives. This is a powerful and deeply moving book. I won't soon forget it." —Elizabeth Gilbert Trent Preszler thought he was living the life he always wanted, with a job at a winery and a seaside Long Island home, when he was called back to the life he left behind. After years of estrangement, his cancer-stricken father had invited him to South Dakota for Thanksgiving. It would be the last time he saw his father alive. Preszler's only inheritance was a beat-up wooden toolbox that had belonged to his father, who was a cattle rancher, rodeo champion, and Vietnam War Bronze Star Medal recipient. This family heirloom befuddled Preszler. He did not work with his hands—but maybe that was the point. In his grief, he wondered if there was still

a way to understand his father, and with that came an epiphany: he would make something with his inheritance. Having no experience or training in woodcraft, driven only by blind will, he decided to build a wooden canoe, and he would aim to paddle it on the first anniversary of his father's death. While Preszler taught himself how to use his father's tools, he confronted unexpected revelations about his father's secret history and his own struggle for self-respect. The grueling challenges of boatbuilding tested his limits, but the canoe became his sole consolation. Gradually, Preszler learned what working with his hands offered: a different perspective on life, and the means to change it. *Little and Often* is an unflinching account of bereavement and a stirring reflection on the complexities of inheritance. Between his past and his present, and between America's heartland and its coasts, Preszler shows how one can achieve reconciliation through the healing power of creativity. "Insightful, lyrical...*Little and Often* proves to be a rich tale of self-discovery and reconciliation. Resonating with Robert Pirsig's classic *Zen and the Art of Motorcycle Maintenance*, it is a profound father-and-son odyssey that discovers the importance of the beauty of imperfection and small triumphs that make extraordinary happen." —USA Today (????)

A Cooperative Species Samuel Bowles 2013-07-21 Why do humans, uniquely among animals, cooperate in large numbers to advance projects for the common good? Contrary to the conventional wisdom in biology and economics, this generous and civic-minded behavior is widespread and cannot be explained simply by far-sighted self-interest or a desire to help close genealogical kin. In *A Cooperative Species*, Samuel Bowles and Herbert Gintis--pioneers in the new experimental and evolutionary science of human behavior--show that the central issue is not why selfish people act generously, but instead how genetic and cultural evolution has produced a species in which substantial numbers make sacrifices to uphold ethical norms and to help even total strangers. The authors describe how, for thousands of generations, cooperation with fellow group members has been essential to survival. Groups that created institutions to protect the civic-minded from exploitation by the selfish flourished and prevailed in conflicts with less cooperative groups. Key to this process was the evolution of social emotions such as shame and guilt, and our capacity to internalize social norms so that acting ethically became a personal goal rather than simply a prudent way to avoid punishment. Using experimental, archaeological, genetic, and ethnographic data to calibrate models of the coevolution of genes and culture as well as prehistoric warfare and other forms of group competition, *A Cooperative Species* provides a compelling and novel account of how humans came to be moral and cooperative.
