Tainaron Leena Krohn 2004 TAINARON: Mail From Another City is the first American publication by the internationally acclaimed Finnish author, Leena Krohn. TAINARON consists of a series of letters sent beyond the sea from a city of insects. TAINARON is a book of changes. It speaks of metamorphoses that test all of nature from a flea to a star, from stone and grass to a human. The same irresistible force that gives us birth, also kills us. Nominated for the prestigious Finlandia prize, this is the perfect introduction to the work of a modern fabulist.

Intentional Perspectives on Information Systems Engineering Selmin Nurcan 2010-06-17 Requirements engineering has since long acknowledged the importance of the notion that system requirements are stakeholder goals—rather than system functions—and ought to be elicited, modeled and analyzed accordingly. In this book, Nurcan and her co-editors collected twenty contributions from leading researchers in requirements engineering with the intention to comprehensively present an overview of the different perspectives that exist today, in 2010, on the concept of intention in the information systems community. These original papers honor Colette Rolland for her contributions to this field, as she was probably the first to emphasize that 'intention' has to be considered as a first-class concept in information systems engineering. Written by long-term collaborators (and most often friends) of Colette Rolland, this volume covers topics like goal-oriented requirements engineering, model-driven development, method engineering, and enterprise modeling. As such, it is a tour d'horizon of Colette Rolland's lifework, and is presented to her on the occasion of her retirement at CAISE 2010 in Hammamet, the conference she once cofounded and which she helped to grow and prosper for more than 20 years.

Icebreaker Horatio Clare 2017-11-09 \*A Newstatesman Book of the Year\* 'Nimble, vital, unexpectedly affecting' Observer Bestselling travel writer Horatio Clare joins an icebreaker for a voyage through the ice-packs of the far north. 'We are celebrating a hundred years since independence this year: how would you like to travel on a government icebreaker?' A message from the Finnish embassy launches Horatio Clare on a voyage around an extraordinary country and an unearthly place, the frozen Bay of Bothnia, just short of the Arctic circle. Travelling with the crew of Icebreaker Otso, Horatio, whose last adventure saw him embedded on Maersk container vessels for the bestseller Down to the Sea in Ships, discovers stories of Finland, of her mariners and of ice. Aboard Otso Horatio gets to know the men who make up her crew, and explores Finland's history and character. Surrounded by the extraordinary colours and conditions of a frozen sea, he also comes to understand something of the complexity and fragile beauty of ice, a near-miraculous substance which cools the planet, gives the stars their twinkle and which may hold all our futures in its crystals.

Advanced Information Systems Engineering Anne Persson 2004-08-18 th CAiSE 2004 was the 16 in the series of International Conferences on Advanced Information Systems Engineering. In the year 2004 the conference was hosted by the Faculty of Computer Science and Information Technology, Riga Technical University, Latvia. Since the late 1980s, the CAiSE conferences have provided a forum for the presentation and exchange of research results and practical experiences within the ?eld of Information Systems Engineering. The conference theme of CAiSE 2004 was Knowledge and Model Driven Information Systems Engineering for Networked Organizations. Modern businesses and IT systems are facing an ever more complex en- ronment characterized by openness, variety, and change. Organizations are - coming less self-su?cient and increasingly dependent on business partners and other actors. These trends call for openness of business as well as IT systems, i.e. the ability to connect and interoperate with other systems. Furthermore, organizations are experiencing ever more variety in their business, in all c- ceivable dimensions. The di?erent competencies required by the workforce are multiplying. In the same way, the variety in technology is overwhelming with a multitude of languages, platforms, devices, standards, and products. Moreover, organizations need to manage an environment that is constantly changing and where lead times, product life cycles, and partner relationships are shortening. ThedemandofhavingtoconstantlyadaptITtochangingtechnologiesandbu- ness practices has resulted in the birth of new ideas which may have a profound impact on the information systems engineering practices in future years, such as autonomic computing, component and services marketplaces and dynamically generated software.

Cybercrime, Organized Crime, and Societal Responses Emilio C. Viano 2016-12-10 This timely book provides contributions on international, comparative crime phenomena: gangs, trafficking, fear of crime, and crime prevention. It highlights contributions originally prepared for the XVII World Congress of Criminology and for the 2015 Cybercrime Conference in Oñati, Spain which have been selected, reviewed, and adapted for inclusion in this volume. The work features international contributors sharing the latest research and approaches from a variety of global regions. The first part examines the impact of gangs on criminal activities and violence. The second part explores illegal trafficking of people, drugs, and other illicit goods as a global phenomenon, aided by the ease of international travel, funds transfer, and communication. Finally, international approaches to crime detection prevention are presented. The work provides case studies and fieldwork that will be relevant across a variety of disciplines and a rich resource for future research. This work is relevant for researchers in criminology and criminal justice, as well as related fields such as international and comparative law, public policy, and public health.

Modern Marine Internal Combustion Engines Ievgen Bilousov 2020-06-30 This book offers a comprehensive and timely overview of internal combustion engines for use in marine environments. It reviews the development of modern four-stroke marine engines, gas and gas–diesel engines and low-speed two-stroke crosshead engines, describing their application areas and providing readers with a useful snapshot of their technical features, e.g. their dimensions, weights, cylinder arrangements, cylinder capabilities, rotation speeds, and exhaust gas temperatures. For each marine engine, information is provided on the manufacturer, historical background, development and technical characteristics of the manufacturer's most popular models, and detailed drawings of the engine, depicting its main design features. This book offers a unique, self-contained reference guide for engineers and professionals involved in shipbuilding. At the same time, it is intended to support students at maritime academies and university students in naval architecture/marine engineering with their design projects at both master and graduate levels, thus filling an important gap in the literature.

Specialised Dictionaries for Learners Pedro A. Fuentres-Olivera 2010-03-26 The need for constructing a lexicographical theory with a particular focus on specialised dictionaries for learners is well documented in recent publications. This will imply paying attention to, at least, four basic lexicographic categories: learners; the learner's situation; the learner's needs; dictionary assistance. In one or other way, these categories are analysed in this book, whose eleven chapters are grouped into three parts. Part 1 reflects on some of the main ideas defended by the function theory of lexicography, perhaps the theoretical framework that has paid more attention to specialised lexicography. Part 2 presents some proposals that have already being explored in the field of general learner's dictionary and must be incorporated into specialised metalexicography: cultural aspects; figurative meaning; the inclusion of grammatical information; the use of corpora. Part 3 introduces the state of play regarding specialised dictionaries in China and offers some ideas for coping with the proliferation of terminological glossaries in Internet. The book also describes Enrique Alcaraz's academic achievements, together with some personal anecdotes, and a personal short tribute to his memory.

Onward Elena Aguilar 2018-05-08 A practical framework to avoid burnout and keep great teachers teaching Onward tackles the problem of educator stress, and provides a practical framework for taking the burnout out of teaching. Stress is part of the job, but when 70 percent of teachers quit within their first five years because the stress is making them physically and mentally ill, things have gone too far. Unsurprisingly, these effects are highest in difficult-to-fill positions such as math, science, and foreign languages, and in urban areas and secondary classrooms—places where we need our teachers to be especially motivated and engaged. This book offers a path to resiliency to help teachers weather the storms and bounce back—and work toward banishing the rain for good. This actionable framework gives you concrete steps toward rediscovering yourself, your energy, and your passion for teaching. You'll learn how a simple shift in mindset can affect your outlook, and how taking care of yourself physically, mentally, and emotionally is one of the most important things you can do. The companion workbook helps you put the framework into action, streamlining your way toward renewal and strength. Cultivate resilience with a four-part framework based on 12 key habits Uncover your true self, understand emotions, and use your energy where it counts Adopt a mindful, story-telling approach to communication and community building Keep learning, playing, and creating to create an environment of collective celebration By cultivating resilience in schools, we help ensure that we are working in, teaching in, and leading organizations where every child thrives, and where the potential of every child is recognized and nurtured. Onward provides a step-by-step plan for reigniting that spark.
