Home in the City Alan B. Anderson 2013-01-01 During the past several decades, the Aboriginal population of Canada has become so urbanized that today, the majority of First Nations and Métis people live in cities. Home in the City provides an in-depth analysis of urban Aboriginal housing, living conditions, issues, and trends. Based on extensive research, including interviews with more than three thousand residents, it allows for the emergence of a new, contemporary, and more realistic portrait of Aboriginal people in Canada's urban centres. Home in the City focuses on Saskatoon, which has both one of the highest proportions of Aboriginal residents in the country and the highest percentage of Aboriginal people living below the poverty line. While the book details negative aspects of urban Aboriginal life (such as persistent poverty, health problems, and racism), it also highlights many positive developments: the emergence of an Aboriginal middle class, inner-city renewal, innovative collaboration with municipal and community organizations, and more. Alan B. Anderson and the volume's contributors provide an important resource for understanding contemporary Aboriginal life in Canada.

National planning policy framework 2012 Great Britain: Department for Communities and Local Government 2012-04-02 The National Planning Policy Framework 2012 sets out the Government's planning policies for England in achieving sustainable development and how these are expected to be applied. It sets out the requirements for the planning system only to the extent that it is relevant, proportionate and necessary to do so. It provides a framework within which local people and their accountable councils can produce their own distinctive local and neighbourhood plans, which reflect the needs and priorities of their communities. This Framework does not contain specific policies for nationally significant projects for which particular considerations apply. Divided into thirteen chapters, with three annexes, it looks at the following areas, including: building a competitive economy; ensuring town centre vitality; supporting a high quality communications infrastructure; delivering high quality homes; protecting the Green Belt; meeting the challenges of climate change, flooding and coastal change; conserving the natural and historic environments and facilitating the sustainable use of minerals.

Suspended Living in Temporary Space Marco Vaudetti 2018-03-30 On 9th October 2017, the international conference Suspended Living in Temporary Space was held at the headquarters of the Architecture School of the Polytechnic of Turin. Some scholars, architects but not only, have found themselves reflecting on the role of the architect and architecture within the almost apocalyptic scenario of the great migratory waves following disasters and emergencies, with specific attention to the context of the Mediterranean area. In this scenario, there are those who flee alone and with the whole family, people who leave a promising profession and others who leave almost nothing; unaccompanied minors and adults. For everyone, we must, first and foremost, guarantee the fundamental right of a refuge. It is easy to see how many studies, idea competitions, experimental projects carried out by architects to tackle this problem, but if we refer to common practice, then we must recognize that the role of architecture as a discipline has been decidedly secondary. The contributions collected here testify to this double track, where the most innovative experiments haven't often interfered with the reality of the facts. The origin of the participants at this conference, Turkey, Spain, Tunisia and Italy, also underlined how the problem of housing emergency is particularly felt and debated in these countries also within the universities.

The Green Book Great Britain. Treasury 2003 This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Closing the Care Gap with Wearable Devices Michael W. Davis 2022-12-07 Patient-focused healthcare, driven by COVID-19 experiences, has become a hallmark for providing healthcare services to patients across all modalities of care and in the home. The ability to capture real-time patient data, no matter the location, via remote patient monitoring, and to transmit that data to providers and organizations approved by the consumer/patient, will become a critical capability for all healthcare providers. Of all the remote patient monitoring product designs, wearable medical devices are emerging as the best positioned to support the evolving patient-focused healthcare environment. This book is for those who are evaluating, selecting, implementing, managing, or designing wearable devices to monitor the health of patients and consumers. This book will provide the knowledge to understand the issues that mitigate the risk of wearable technologies so people can deliver successful projects using these technologies. It will discuss their use in remote patient monitoring, the advantages and disadvantages of different types of physiological sensors, different wireless communication protocols, and different power sources. It will describe issues and solutions in cybersecurity and HIPAA compliance, as well as setting them up to be used in healthcare systems and by patients.

Strategy, Structure, and Performance of MNCs in China Yadong Luo 2001 China is the largest emerging market in the world, yet Western MNCs have invested significantly less there than their Asian MNC counterparts. Luo systematically compares Western and Asian investment strategies and their performance in the China market and finds lessons that Westerners must heed. He also reviews and analyzes new economic and regulatory environments (e.g., WTO) in China and their potential effect on all foreign investors. Clearly written and readable by anyone reasonably familiar with matters of world trade and investment, the book illustrates its points with case studies drawn from Luo's own research and is difficult to find elsewhere. The result is a needed contribution to the literature on international investment in the China market, primarily for upper level executives and scholars specializing in emerging markets and international business.

Cracked it! Bernard Garrette 2018-06-08 Solving complex problems and selling their solutions is critical for personal and organizational success. For most of us, however, it doesn't come naturally and we haven't been taught how to do it well. Research shows a host of pitfalls trips us up when we try: We're quick to believe we understand a situation and jump to a flawed solution. We seek to confirm our hypotheses and ignore conflicting evidence. We view challenges incompletely through the frameworks we know instead of with a fresh pair of eyes. And when we communicate our recommendations, we forget our reasoning isn't obvious to our audience. How can we do it better? In Cracked It!, seasoned strategy professors and consultants Bernard Garrette, Corey Phelps and Olivier Sibony present a rigorous and practical four-step approach to overcome these pitfalls. Building on tried-and-tested (but rarely revealed) methods of top strategy consultants, research in cognitive psychology, and the latest advances in design thinking, they provide a step-by-step process and toolkit that will help readers tackle any challenging business problem. Using compelling stories and detailed case examples, the authors guide readers through each step in the process: from how to state, structure and then solve problems to how to sell the solutions. Written in an engaging style by a trio of experts with decades of experience researching, teaching and consulting on complex business problems, this book will be an indispensable manual for anyone interested in creating value by helping their

organizations crack the problems that matter most.

Assistive Technologies and Environmental Interventions in Healthcare Lynn Gitlow 2019-10-07 Providing a holistic and client-centered approach, Assistive Technologies and Environmental Interventions in Healthcare explores the individual's needs within the environment, examines the relationship between disability and a variety of traditional and cutting-edge technologies, and presents a humanistic discussion of Technology-Environment Intervention (TEI). Written by a multidisciplinary team of authors, this text introduces readers to a variety of conceptual practice models and the clinical reasoning perspectives. It also provides insight into how designers go about solving human-tech problems, discusses best practices for both face-to-face and virtual teams, and looks at the psychological, sociocultural, and cognitive factors behind the development and provision of assistive technologies. Examines a wide range of technologies and environmental interventions Demonstrates how a better understanding of the complexity of human interaction with both the physical and social environment can lead to better use of technology Explores the future of technology and research in TEI Complete with a range of learning features such as keywords, case studies and review questions, this book is ideal for undergraduate and graduate students in occupational therapy and other related health professions, as well as those undertaking certification and board examinations.

Future Telco Peter Krüssel 2018-07-23 This book examines the extensive changes in markets, technologies and value chains that telecommunication companies are currently confronted with. It analyzes the crossroads they have reached and the choices that now need to be made – to be a bit pipe or a trendsetter of digitalization. Based on an analysis of the key challenges for telcos, the book derives future market scenarios and puts forward recommendations for how they can successfully position themselves. It proposes a framework based on seven "levers," which addresses concrete measures in each step of the value chain, ranging from technology, IT and processes, to innovation, marketing and sales issues. The book discusses the current challenges and provides both general recommendations and concrete solutions. Respected experts illustrate innovative strategic and technical trends and provide insights gained in real-life transformation projects. Recent developments in the areas of regulation, product development, competition between over-the-top (OTT) providers and telcos, as well as technical innovations like 5G, SDN/NFV, LEO satellites and MEC are discussed. Accordingly, practitioners, managers and researchers alike will benefit from the book's wealth of examples and up-to-date insights.

Digital Government Bernd W. Wirtz 2022-10-07 Digitization, the global networking of individuals and organizations, and the transition from an industrial to an information society are key reasons for the importance of digital government. In particular, the enormous influence of the Internet as a global networking and communication system affects the performance of public services. This textbook introduces the concept of digital government as well as digital management and provides helpful insights and strategic advice for the successful implementation and maintenance of digital government systems.

Smart Products, Smarter Services Mary J. Cronin 2010-08-19 We are surrounded by products that have minds of their own. Computing power, in the form of microcontrollers, microprocessors, sensors, and data storage chips, has become so cheap that manufacturers are building connectivity and embedded intelligence into all types of consumer goods. These 'smart products' are fundamentally changing both the competitive landscape for business and the daily lives of consumers. This book analyzes the evolution of smart products to help managers understand the impact of embedded product intelligence on corporate strategy, consumer value, and industry competition. It describes four different ecosystem strategies for designing and launching smart products: the control-focused Hegemon, the standards-focused Federator, the high growth and brand-focused Charismatic Leader, and the disruptive industry Transformer. This ecosystem model is then applied to smart products in the automotive, wireless, energy, residential, and health industries. The book concludes with recommendations for successfully managing smart products and services.

Disaster Recovery Brenda D. Phillips 2009-05-06 Disaster recovery is often unplanned for in the emergency management life cycle. Yet recovery is the key stage where funds, programs, professional expertise, and volunteer efforts are applied to affected cities, states, and regions to get them up and running again. Providing a unique perspective on a highly focused area, Disaster Recovery is the fi

Manual of Community Nursing and Communicable Diseases Marie E. Vlok 1996-01-28 This edition, written as South Africa moves from expensive curative health care to a more people-focused primary health-care system, highlights transitional structures and bridges the gap between past and present. Part One focuses on the Government of National Unity and population development programmes, emphasising the role of community nurses in the primary health-care system. Subsequent sections cover factors playing an important role in community nursing, including housing, urbanisation and malnutrition. In accordance with the National Health-care Plan for South Africa, prominence is given to issues such as health education and maternal and child health care. The section on communicable diseases has been updated and takes into account changes in legislation and the latest statistical information. Primary health-care problems at community level are covered in depth. Students and practitioners will benefit from the wealth of information in this new edition.

Prevent strategy Great Britain: Home Office 2011-06-07 The Prevent strategy, launched in 2007 seeks to stop people becoming terrorists or supporting terrorism both in the UK and overseas. It is the preventative strand of the government's counter-terrorism strategy, CONTEST. Over the past few years Prevent has not been fully effective and it needs to change. This review evaluates work to date and sets out how Prevent will be implemented in the future. Specifically Prevent will aim to: respond to the ideological challenge of terrorism and the threat we face from those who promote it; prevent people from being drawn into terrorism and ensure that they are given appropriate advice and support; and work with sectors and institutions where there are risks of radicalization which need to be addressed

Just Below the Line Korydon H. Smith 2010-05 With America on the brink of the largest number of older adults and persons with disabilities in the country's history, the deceleration in housing production during the first decade of the twenty-first century, and a continued reliance on conventional housing policies and practices, a perfect storm has emerged in the housing industry. The lack of fit between the existing housing stock and the needs of the U.S. population is growing pronounced. Just as housing needed to be retooled at the end of WWII, the American housing industry is in dire need of change today. The South—with its high rates of poverty, older residents, residents with disabilities, extensive rural areas, and out-of-date housing policies and practices—serves as a "canary in the coal mine" for the impending, nationwide housing crisis. Just Below the Line discusses how reworking the policies and practices of the housing industry in the South can serve as a model for the rest of the nation in meeting the physical and social needs of persons with disabilities and aging boomers. Policy makers, designers, builders, realtors, advocates, and housing consumers will be able to use this book to promote the production of equitable housing nationwide. Published in collaboration with the Fay Jones School of Architecture.

Strategic Human Capital Management Jon Ingham 2007-02-07 Strategic human capital management (HCM) is not just a measurement focused approach to human resource management (HRM). It is certainly not a decision science in which people can be managed as a result of quantitative analysis and financial valuation. In fact, it is probably more of an art than a science and is a way of leading people to unlock great business performance. Strategic HCM focuses all people management and development practices on maximizing the capability and engagement of the people working for an organization to create valuable intangible capability, human capital, which enables the organisation to take full advantage of potential business opportunities. Unlike HRM which focuses on getting closer and closer to the business, strategic HCM draws its energy from people, from their individual strengths, interests and motivations, which, aligned with long-term business strategy, can increasingly provide the main basis for differentiation and competitive advantage. However, the perspective also recognizes that measurement is important, and the book outlines an approach to measurement which recognizes the importance of knowledge, complexity, best fit and intangibility. Pulling together seemingly disparate strands of thinking, the book calls for a paradigm change in which people really are seen as an organisation's most important asset, and are managed in a way that reflects this fact. The text includes case studies from leading private and public sector organizations and commentary from HR practitioners and academics.

Drawdown Paul Hawken 2018-02-22 NEW YORK TIMES BESTSELLER For the first time ever, an international coalition of leading researchers, scientists and policymakers has come together to offer a set of realistic and bold solutions to climate change. All of the techniques described here - some well-known, some you may have never heard of - are economically viable, and communities throughout the world are already enacting them. From revolutionizing how we produce and consume food to educating girls in lower-income countries, these are all solutions which, if deployed collectively on a global scale over the next thirty years, could not just slow the earth's warming, but reach drawdown: the point when greenhouse gasses in the atmosphere peak and begin todecline. So what are we waiting for?

Strategic Management A. Naga In today's world, 'change' is the only 'constant' factor. In the last few decades, there has been a radical change in how organizations function. To survive in this highly volatile environment, companies

need a long-term strategic vision and thinking. In light of this, 'strategic management' has become a significant topic and is taught as the core subject in MBA/PGDM programmes in Indian universities and business schools. This is a book written in the context of the Indian business environment but with a global orientation. It is comprehensive and contemporary in its approach.

The Future Home in the 5G Era Jefferson Wang 2020-04-03 The Future Home in the 5G Era looks at new hyper-connected home environments in which devices and apps will work together seamlessly to respond to and anticipate customers' needs, all with maximum security and privacy. Enabled by 5G, AI, and other new technologies such as eSim and edge computing, the Future Home's powerful service ecosystems will be a quantum leap from today's fragmented smart home technology, effectively extending the boundaries of the home even beyond the traditional bounds of the physical, to ultimately make consumers feel 'at home' anywhere. This will create tremendous opportunities for businesses including communication service providers (CSPs), device manufacturers and app developers, as well as those providing services in diverse sectors such as entertainment, health and social care, education, retail, and more. The Future Home in the 5G Era combines original research from Accenture with practical insights and examples, showing how intelligently orchestrated Future Homes can yield economic success for businesses. Written by leaders of strategy and technology consultancy at Accenture, the authors have vast industry experience leading major units of Fortune 500 companies and start-ups. This book looks at how businesses, especially CSPs, can overcome the challenges and capture the multi-billion-dollar Future Home market by putting strategic emphasis on excellent customer experiences, developing new business models, and turning their organizations into competitively agile platform-based innovators. For business leaders in any sector relevant to the Future Home, this book is an indispensable and value-creating guide.

Digital Business and Electronic Commerce Bernd W. Wirtz 2021-03-28 This textbook introduces readers to digital business from a management standpoint. It provides an overview of the foundations of digital business with basics, activities and success factors, and an analytical view on user behavior. Dedicated chapters on mobile and social media present fundamental aspects, discuss applications and address key success factors. The Internet of Things (IoT) is subsequently introduced in the context of big data, cloud computing and connecting technologies, with a focus on industry 4.0, smart business services, smart homes and digital consumer applications, as well as artificial intelligence. The book then turns to digital business models in the B2C (business-to-consumer) and B2B (business-to-business) sectors. Building on the business model concepts, the book addresses digital business strategy, discussing the strategic digital business environment and digital business value activity systems (dVASs), as well as strategy development in the context of digital business. Special chapters explore the implications of strategy for digital marketing and digital procurement. Lastly, the book discusses the fundamentals of digital business technologies and security, and provides an outline of digital business implementation. A comprehensive case study on Google/Alphabet, explaining Google's organizational history, its integrated business model and its market environment, rounds out the book.

Open Services Innovation Henry Chesbrough 2011-01-18 The father of "open innovation" is back with his most significant book yet. Henry Chesbrough's acclaimed book Open Innovation described a new paradigm for management in the 21st century. Open Services Innovation offers a new approach that demonstrates how open innovation combined with a services approach to business is an effective and powerful way to grow and compete in our increasingly services-driven economy. Chesbrough shows how companies in any industry can make the critical shift from product- to service-centric thinking, from closed to open innovation where co-creating with customers enables sustainable business models that drive continuous value creation for customers. He maps out a strategic approach and proven framework that any individual, business unit, company, or industry can put to work for renewed growth and profits. The book includes guidance and compelling examples for small and large companies, services businesses, and emerging economies, as well as a path forward for the innovation industry. "Whether you are managing a product or a service, your business needs to become more open and more inclusive in order to be more innovative. Open Services Innovation will be an invaluable guide to intrepid managers who commit to making that journey." —GARY HAMEL, visiting professor, London Business School; director, Management Lab; and author, The Future of Management "I tore out page after page to share with my leaders. Chesbrough has pioneered an entire rethink of business innovation that's rich in concept, deeply explained, with tools ready to use in every industry." —SCOTT COOK, founder and chairman of the executive committee, Intuit "Focusing on core competence often tempts managers to keep continuing

what succeeded in the past. A far more important question is what capabilities are critical in the future, and Chesbrough shows how to ask and answer these issues." —CLAYTON CHRISTENSEN, Robert & Jane Cizik Professor of Business Administration, Harvard Business School, and author, The Innovator's Dilemma "To thrive, businesses will need to master the lessons of open service innovation. Here is their one-stop guidebook with important lessons clearly and compellingly presented." —JAMES C. SPOHRER, director, IBM University Programs World-Wide "Open Innovation pioneer Henry Chesbrough breaks new ground with Open Services Innovation, a persuasive argument for the power of co-creation in the world of services." —TOM KELLEY, general manager, IDEO, and author, The Ten Faces of Innovation, The Art of Innovation "With his trademark style of beautifully explained examples, Henry Chesbrough shows how open service innovation and new business models can help you escape this product commodity trap and bring you to the next level of competition." —ALEX OSTERWALDER, author, Business Model Generation "Open Services Innovation shows how a business can redefine itself as a service organisation and tap into faster growth through shared innovation." —SIR TERRY LEAHY, chief executive, Tesco "Chesbrough shows how innovating openly with a services mindset can make you a market leader." —CHARLENE LI, author, Open Leadership, and founder, Altimeter Group

Strategic Planning Robert G. Wittmann 2008 Closely aligning with the military strategy concepts that the ancient Chinese warrior-philosopher Sun Tzu developed in The Art of War over 2500 years ago, Strategic Planning is a practical guide written by two German experts in strategy and innovation. Witmann and Reuter help leaders develop the ability to recognize opportunities in their corporate environment and take advantage of these opportunities effectively and flexibly by implementing revenue-generating strategies. To foster active participation, they engage readers in direct question "workshops" that can be worked through individually or in teams, guiding them through analysis of value-based management, the strategic environment, strategic strength development, building strategies to suit products, and techniques to gain competitive advantage. A full case study in strategy and business planning further coaches readers in handling the challenges of value creation and long-term success.
