Handbook of Research on Fostering Social Justice Through Intercultural and Multilingual Communication Meletiadou, Eleni 2022-09-01 Students taught with a social justice framework will ideally have a stronger sense of what is just and fair and choose careers and lifestyles that support their communities. Over time, students look at current and historical events—even their own actions—through the lens of social justice, promoting better decision-making. Building trust impacts the bottom line for global companies, and multilingual communication is a core pillar for effective growth. It is essential to promote this trust through social justice and educate learners on intercultural and multilingual communication. The Handbook of Research on Fostering Social Justice Through Intercultural and Multilingual Communication explores innovative teaching, learning, and assessment practices that foster social justice and enhance intercultural and multilingual communication in primary, secondary, post-secondary, and higher education. It demonstrates the value of adopting a social justice lens in education by broadening and strengthening the evidence base of the impact that this can

make for students, educators, and society as a whole. Covering topics such as game-based assessment, social adaptation, and plurilingual classroom citizenship, this premier reference source is an excellent resource for educators and administrators of both K-12 and higher education, librarians, pre-service teachers, teacher educators, government officials, educational managers, linguists, researchers, and academicians.

Ageism in Youth Studies Gayle Kimball 2017-05-11 Ageism is prevalent in a great deal of current scholarship in the social sciences as scholars fault youth for being delinquent or politically apathetic. Researchers ignore young people's actual voices, despite their leadership in recent global uprisings, some of which unseated entrenched dictators. Neoliberalism must be exposed in its focus on youth sub-cultures and styles rather than economic barriers caused by growing inequality and rising youth unemployment rates. Ageism in Youth Studies also discusses the debate about "Generation We or Me" and if Millennials are narcissistic. Resources about global youth studies are included, along with the results of the author's surveys and interviews with over 4,000 young people from 88 countries.
